iCloud Mail: Senders

October 2024

File name Senders.csv

File description This file contains information on senders that the user has received emails from and any sender-based categories set by the user.

Why Apple keeps this information Apple retains this information on the user's sender emails and the categorization overrides, (the result of the user manually re-categorizing a sender or group of senders to a target category) which are persisted in iungo until the user removes them.

Field Name	Details
Default Email Category Timestamp	The date and time (in milliseconds) when user manually last updated the default email category
Email Category	Email category assigned to the sender by the user
Email Category Timestamp	The date and time (in milliseconds) when user last updated the email category
Sender Name	Display name of the sender
